

Quick Start

Upon loading, a status indicates a successful database load:

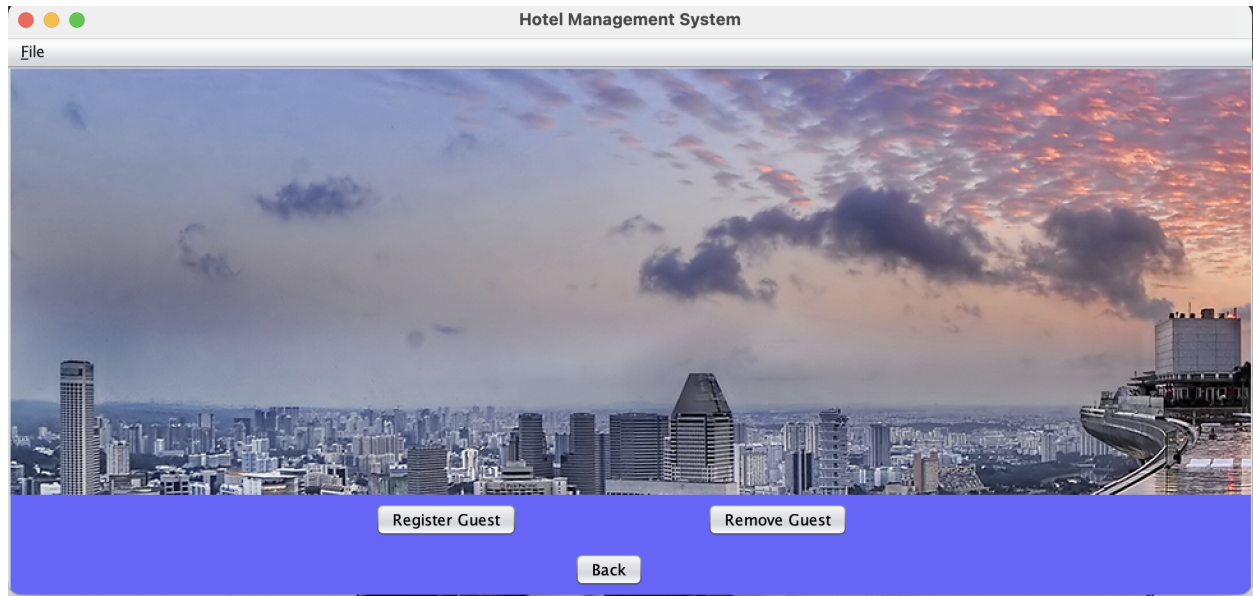

This error message usually indicates the file was not found upon initial load. If the file is not corrupt, it will create one for you.

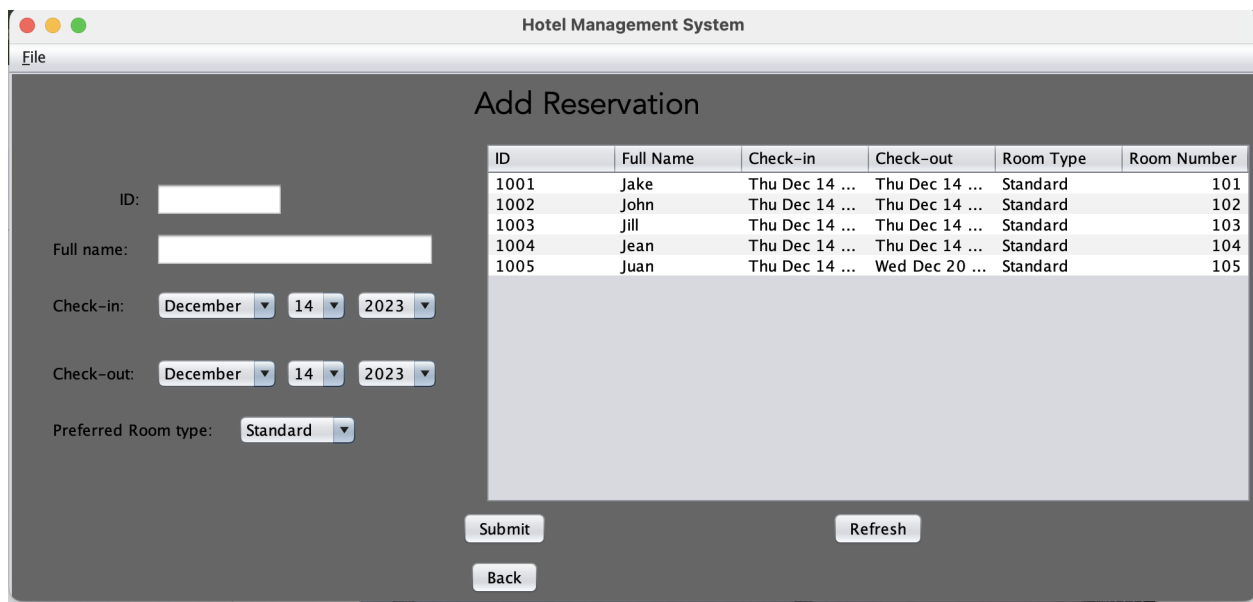

Quick Start

Guest services:

'Add Reservation' and 'Remove Guest' share the same GUI, but different logic is passed.

Quick Start

File

Check-out Guest

ID:

Full name:

Check-in:

Check-out:

Preferred Room type:

ID	Full Name	Check-in	Check-out	Room Type	Room Number
1001	Jake	Thu Dec 14 ...	Thu Dec 14 ...	Standard	101
1002	John	Thu Dec 14 ...	Thu Dec 14 ...	Standard	102
1003	Jill	Thu Dec 14 ...	Thu Dec 14 ...	Standard	103
1004	Jean	Thu Dec 14 ...	Thu Dec 14 ...	Standard	104
1005	Juan	Thu Dec 14 ...	Wed Dec 20 ...	Standard	105

The 'ID' field acts as a search field. Upon 'lost focus', it'll update the table accordingly.

File

Add Reservation

ID:

Full name:

Check-in:

Check-out:

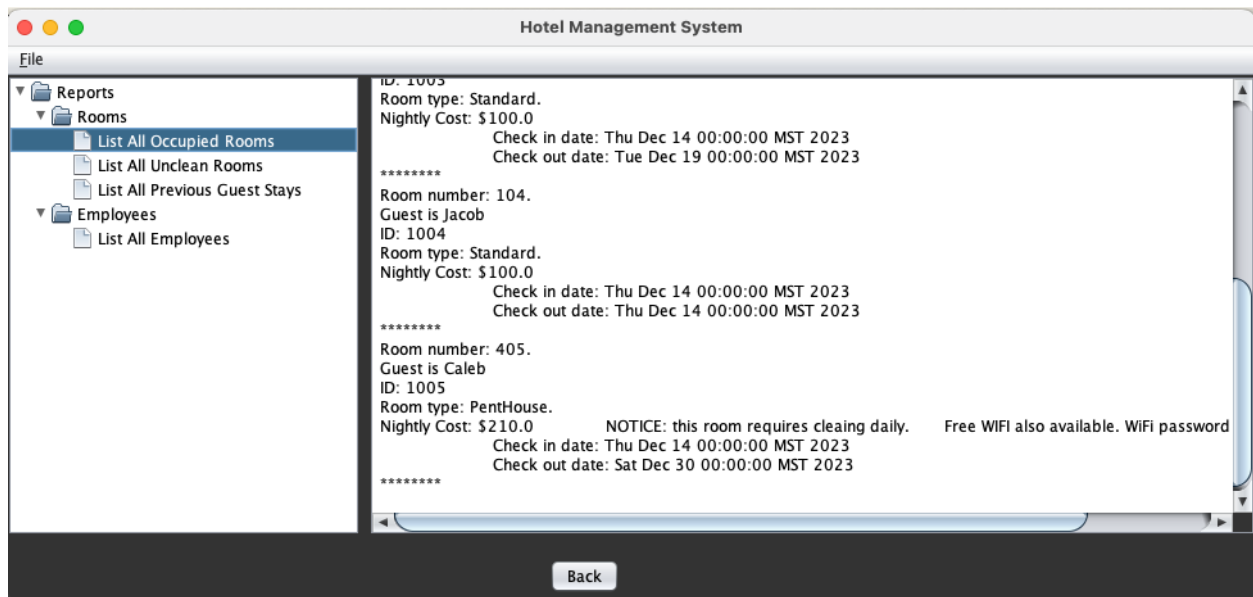

Preferred Room type:

ID	Full Name	Check-in	Check-out	Room Type	Room Number
1001	Jake	Thu Dec 14 ...	Thu Dec 14 ...	Standard	101

The 'Refresh' button will refresh the table to populate all.

Quick Start

Clicking on the item produces the respective query:

This screen allows for employee addition:
